The growing aggressiveness of American Middle East policy stems from the latture in the 70s of the moin American objectives in the region, i.e., to weaken the revolutionary processes in every way, and to expand the base for US monopolies, writes O. Alexandrav in the AFRICA AND ASIA TODAY magazine. Not were these objectives advanced when istoeli aggression was polecd, as Damocice' sword over Atob counties with the direct countronce and involvement of the United States or when Sadot went in for capitalollon. The onli-Atob Camp David sell-out was eigned lital and lotemas to drive a wedge between Alab countries and to avoid the radical issues lying of the heart of a genuina Middle East sci-tlement—the withdrawof of larcell traops from the Arab lands occupied in 1967, and the granting to the Paleetinion Araba

of their tnaitenable rights.

Contror to the expectations of Washington nirolegists, the American policy of backing larger has led to a growth in anti-American sentiment in the Arab world, and did not in the slightest undermine the progressive regimes.
